How often am I here?

Am I usually here on
weekends, weekdays, or
both?

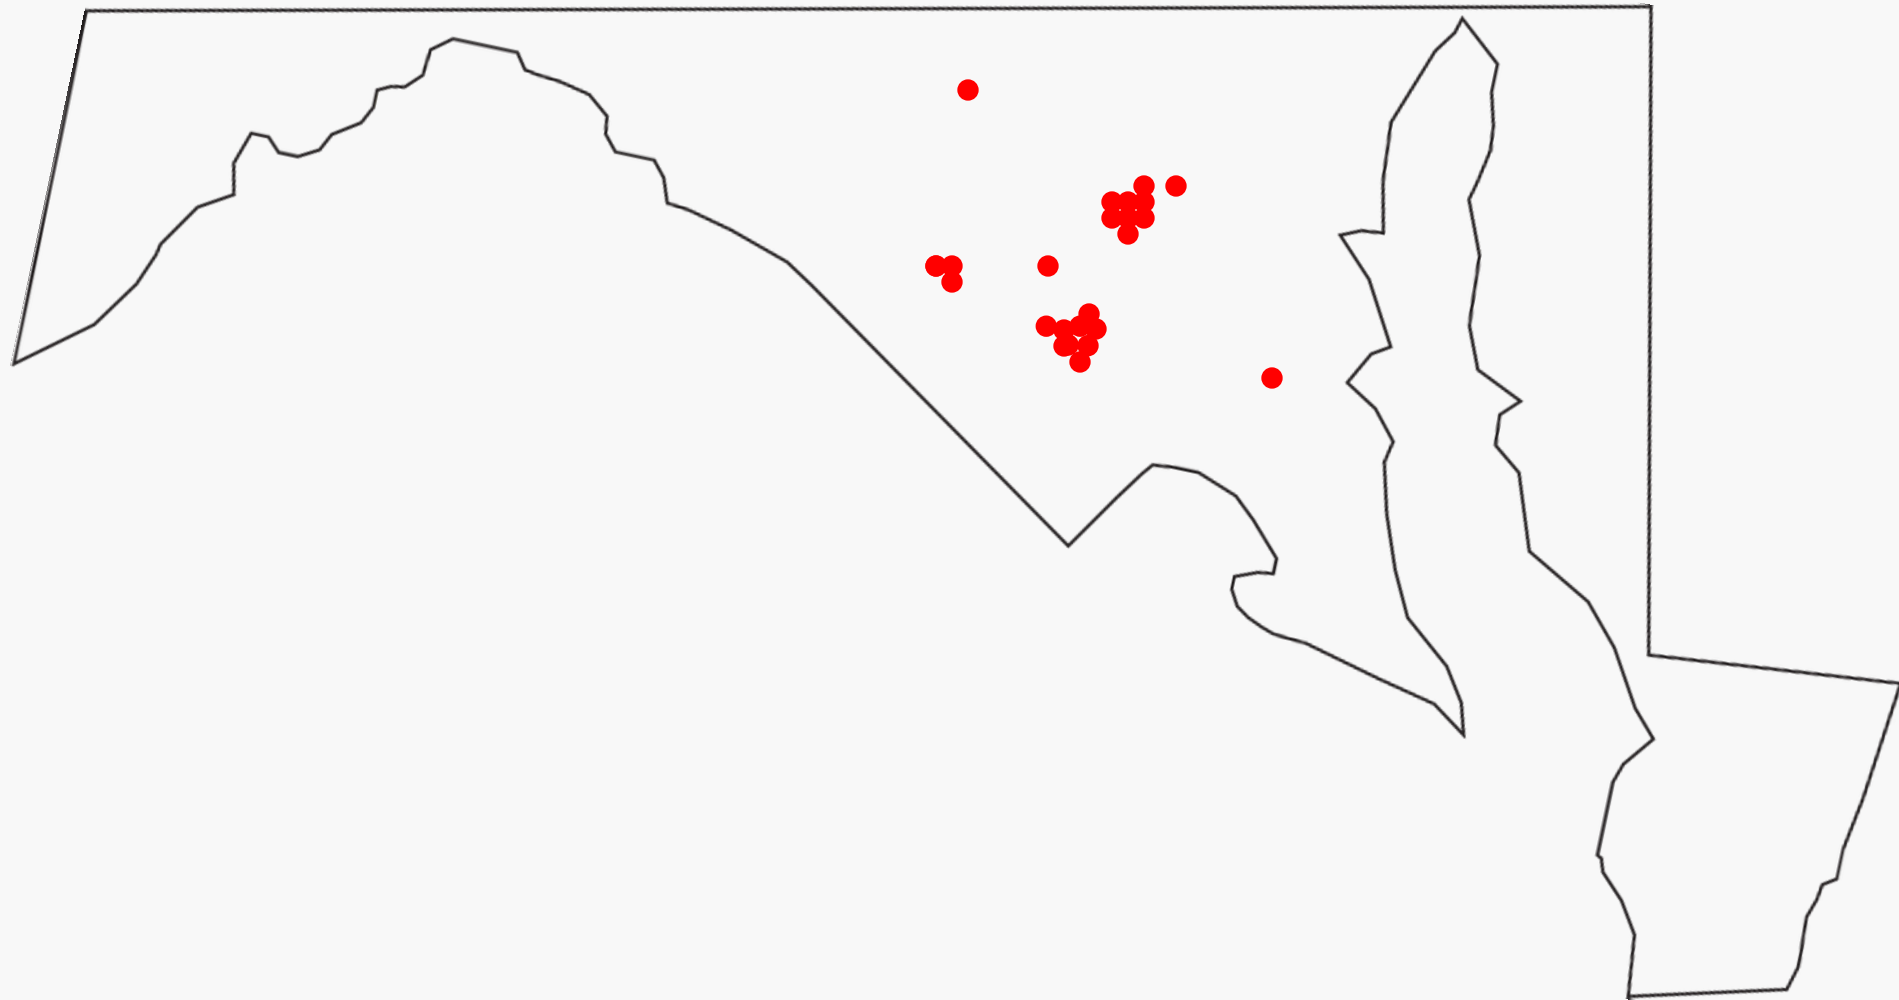

When was I last here?

How long did I stay here?

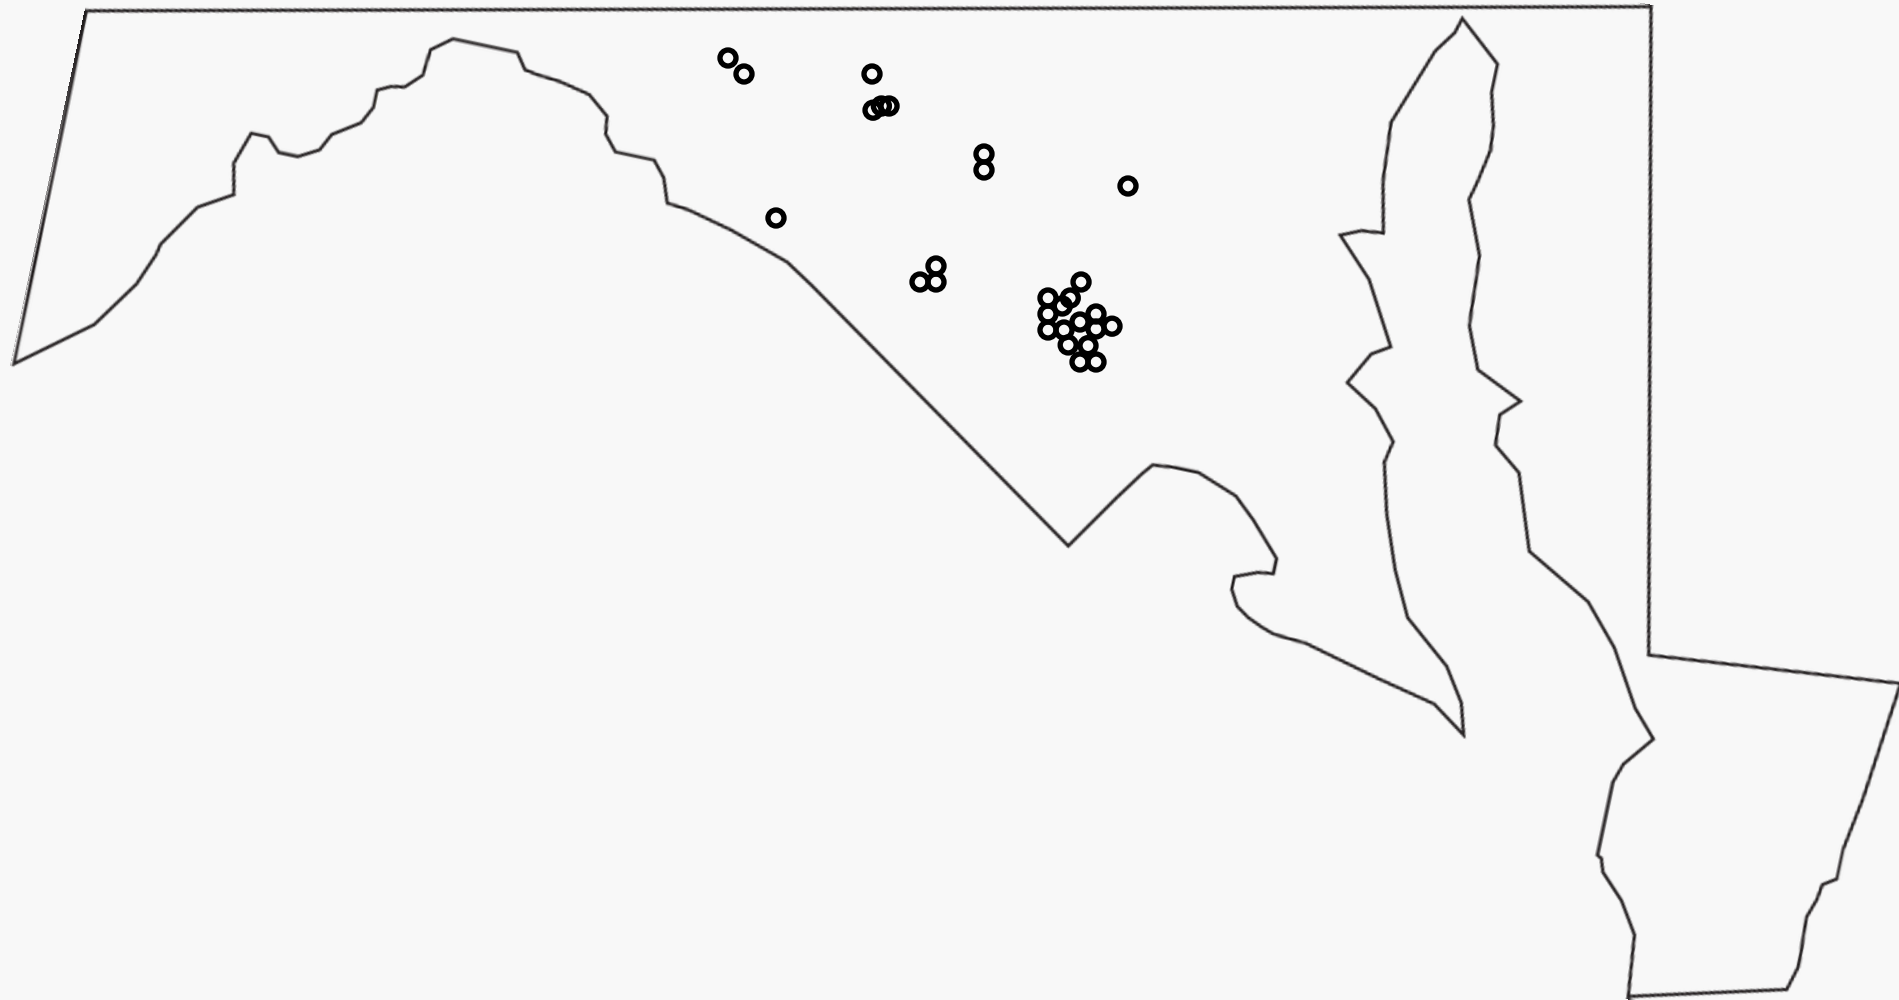

What times of the day
can I be found here?

Weekday Day Points

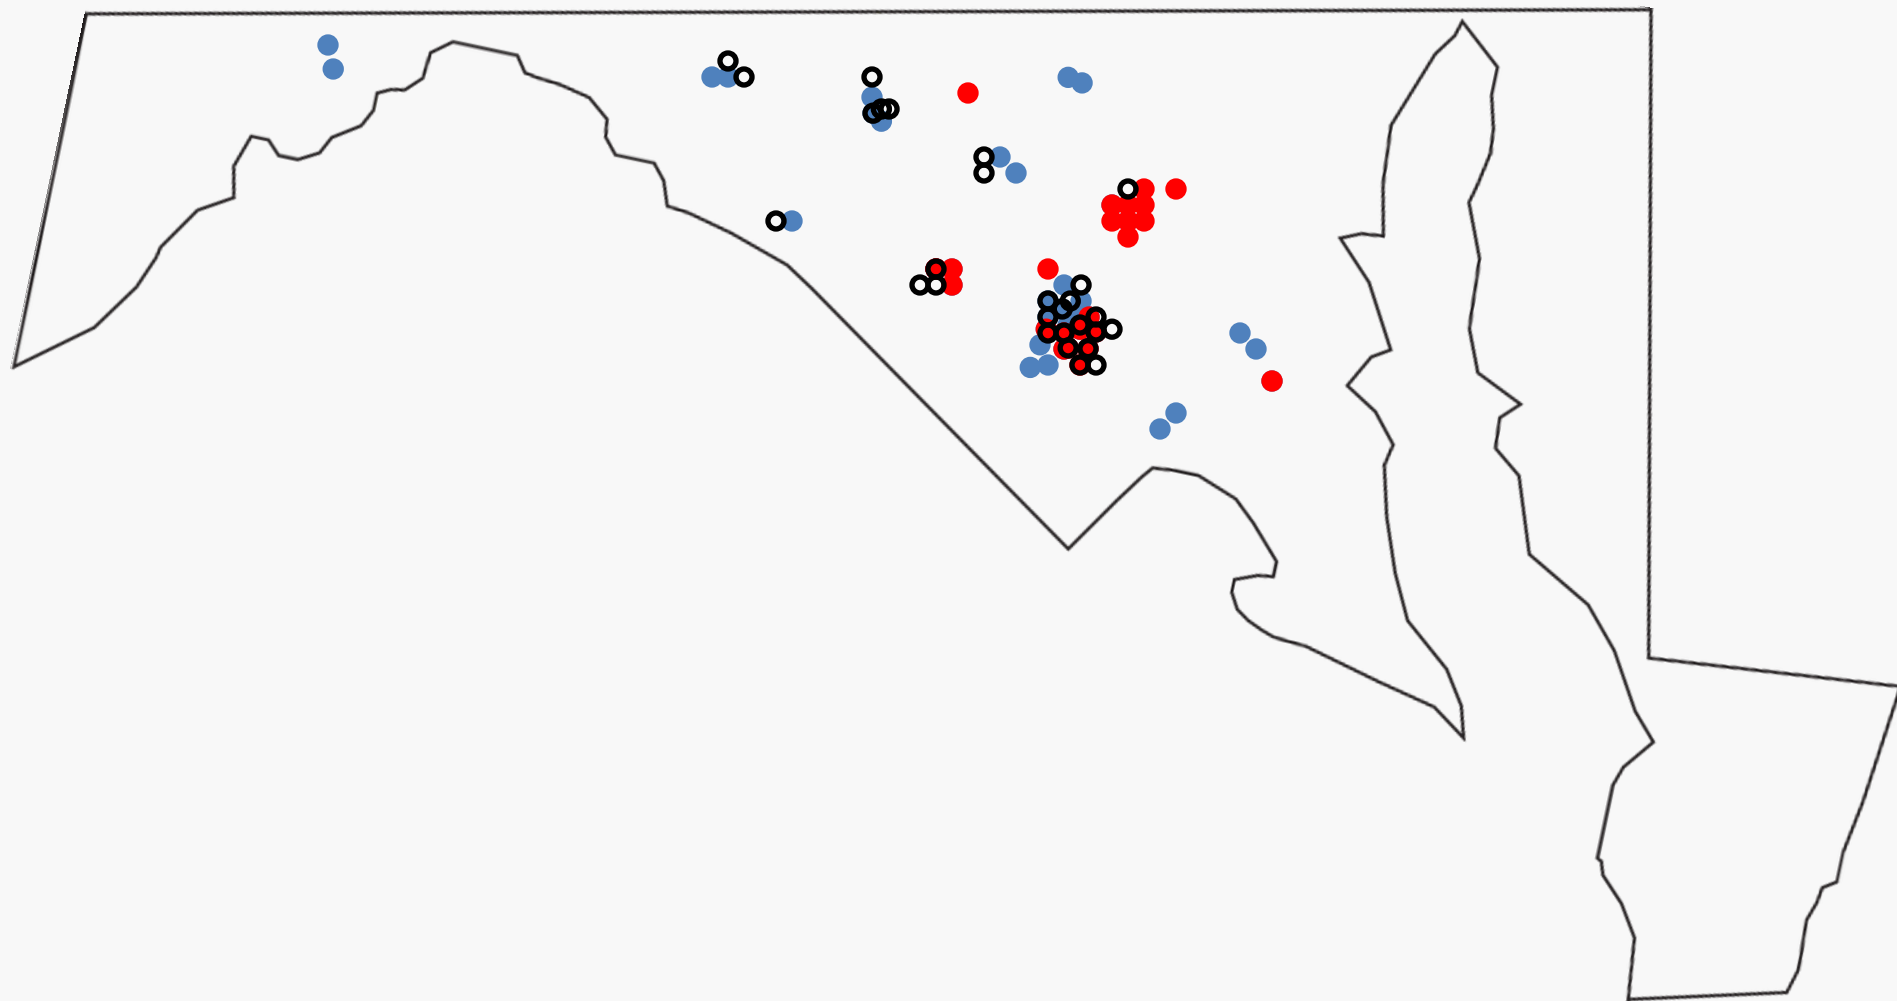

Weekday Evening Points

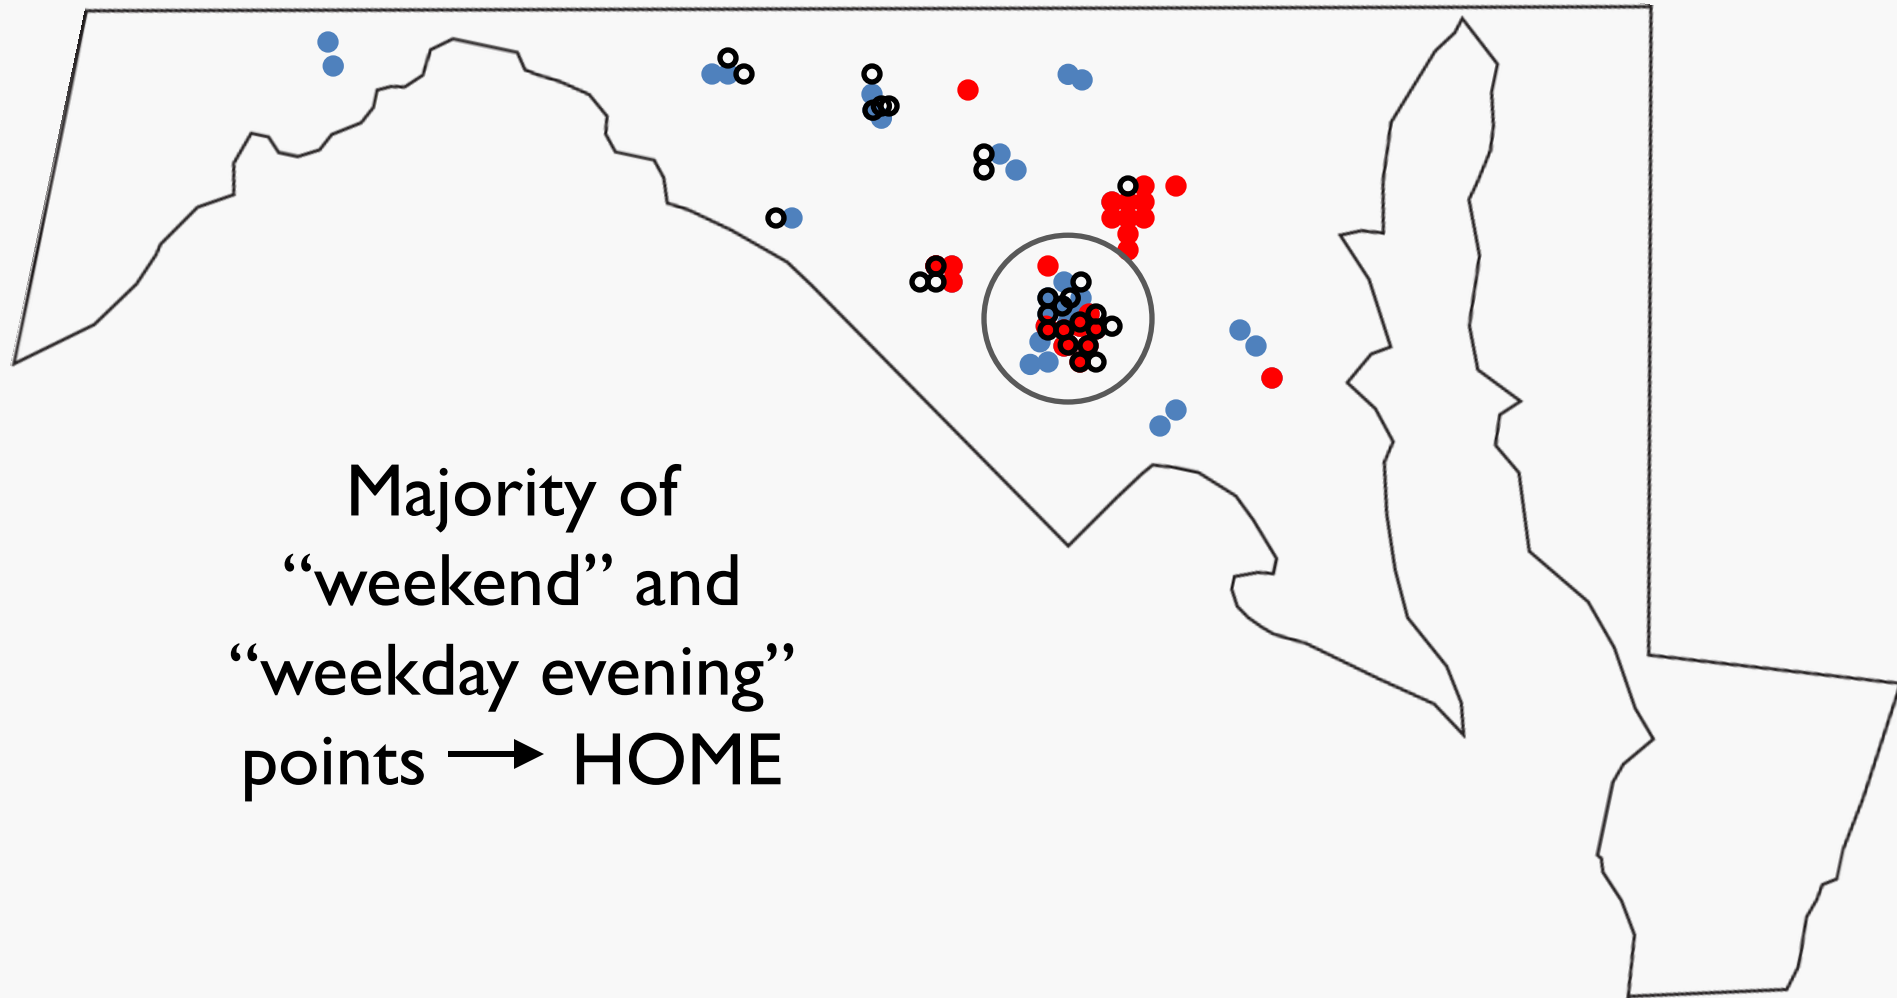

Weekend Points

All Points

All Points

If I Know Home, Then I Know...

- When I'm likely to be
 - home
 - away from home
- Local travel radius
- Distance from home at any given point

Significant Location Types

HOME

**AWAY
FROM
HOME**

LOCAL

Non-Home Locations

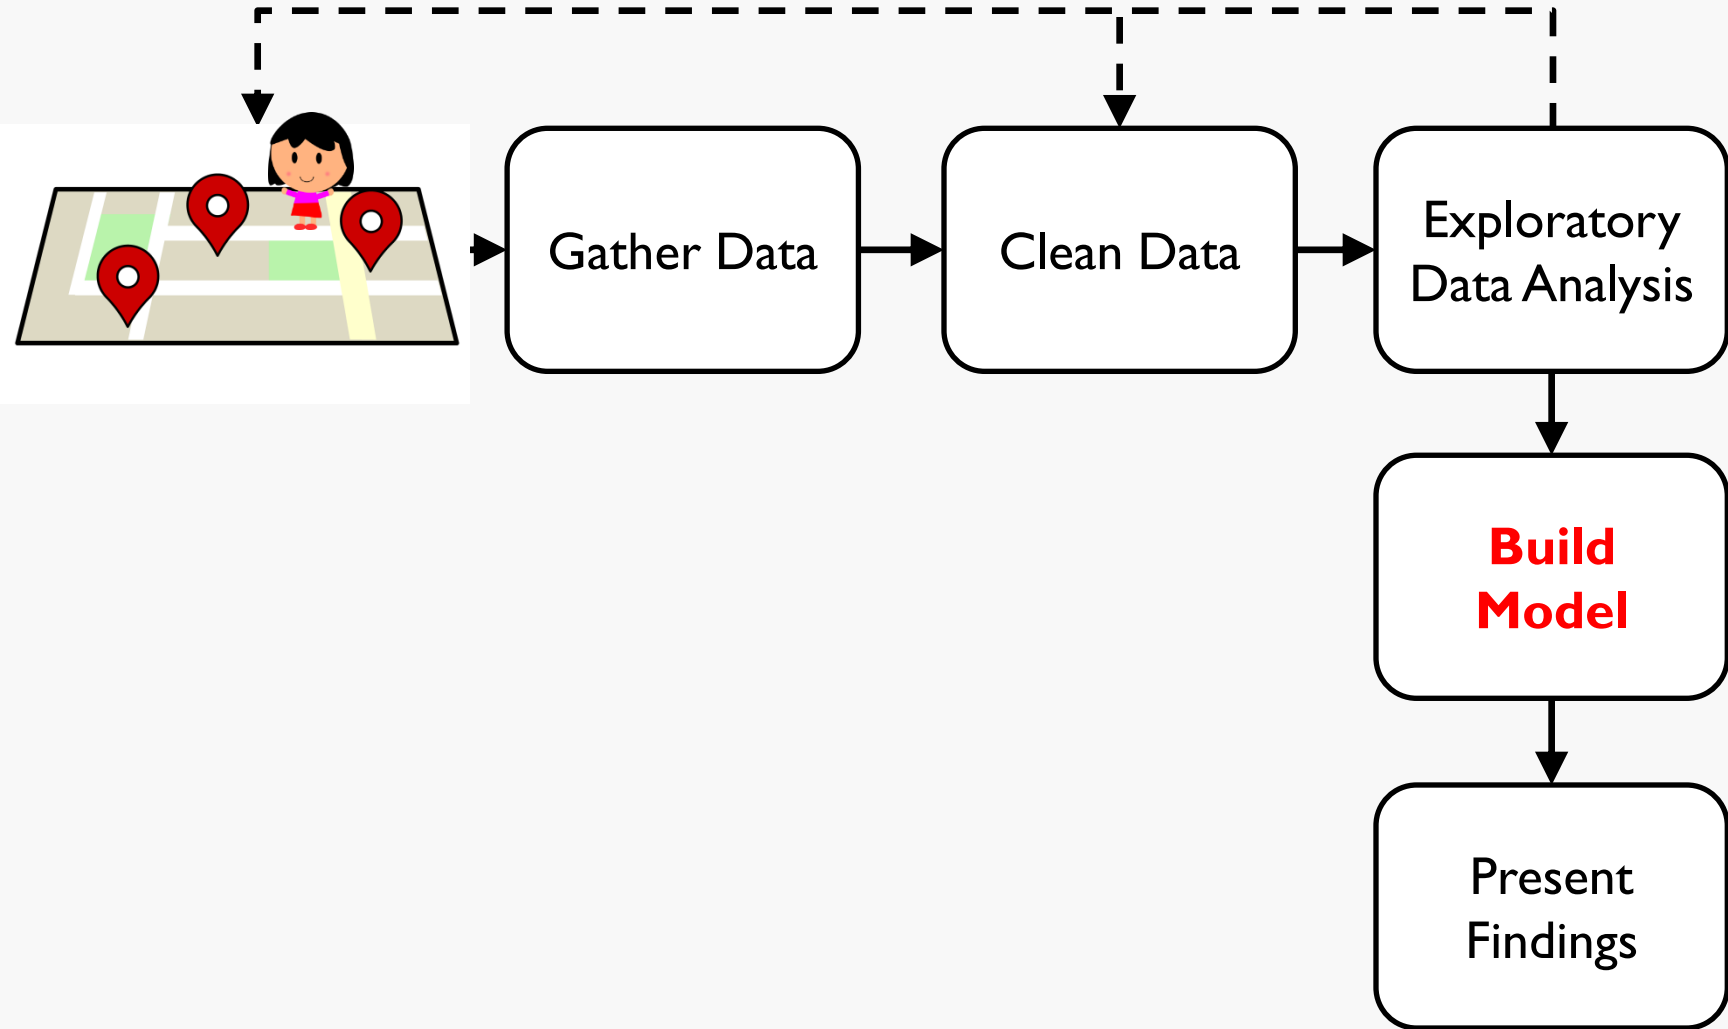

- Away From Home
 - Visited on days I was never home
 - Vacation hotels
 - Conference center
 - Parents' home
- Local
 - *Work*: If there on weekdays for at least 5 hours
 - *Weekend*: If I'm only there on Sat / Sun
 - Concert Venue
 - *Same Day*: Only there on a specific day of week
 - Farmer's Market

Psst...

Google already asks for
your Home and Work
addresses.

To help you with your
commute, or ... ??

Data Science Process

Significant Location Details

- Lat / Long Boundaries
- Type of location
 - *home, work, weekend, sameDay*

Data Point Details

Original

```
<when>2017-03-30T22:16:05Z</when>  
<gx:coord>-112.1206089 36.0538447 2110</gx:coord>
```

New

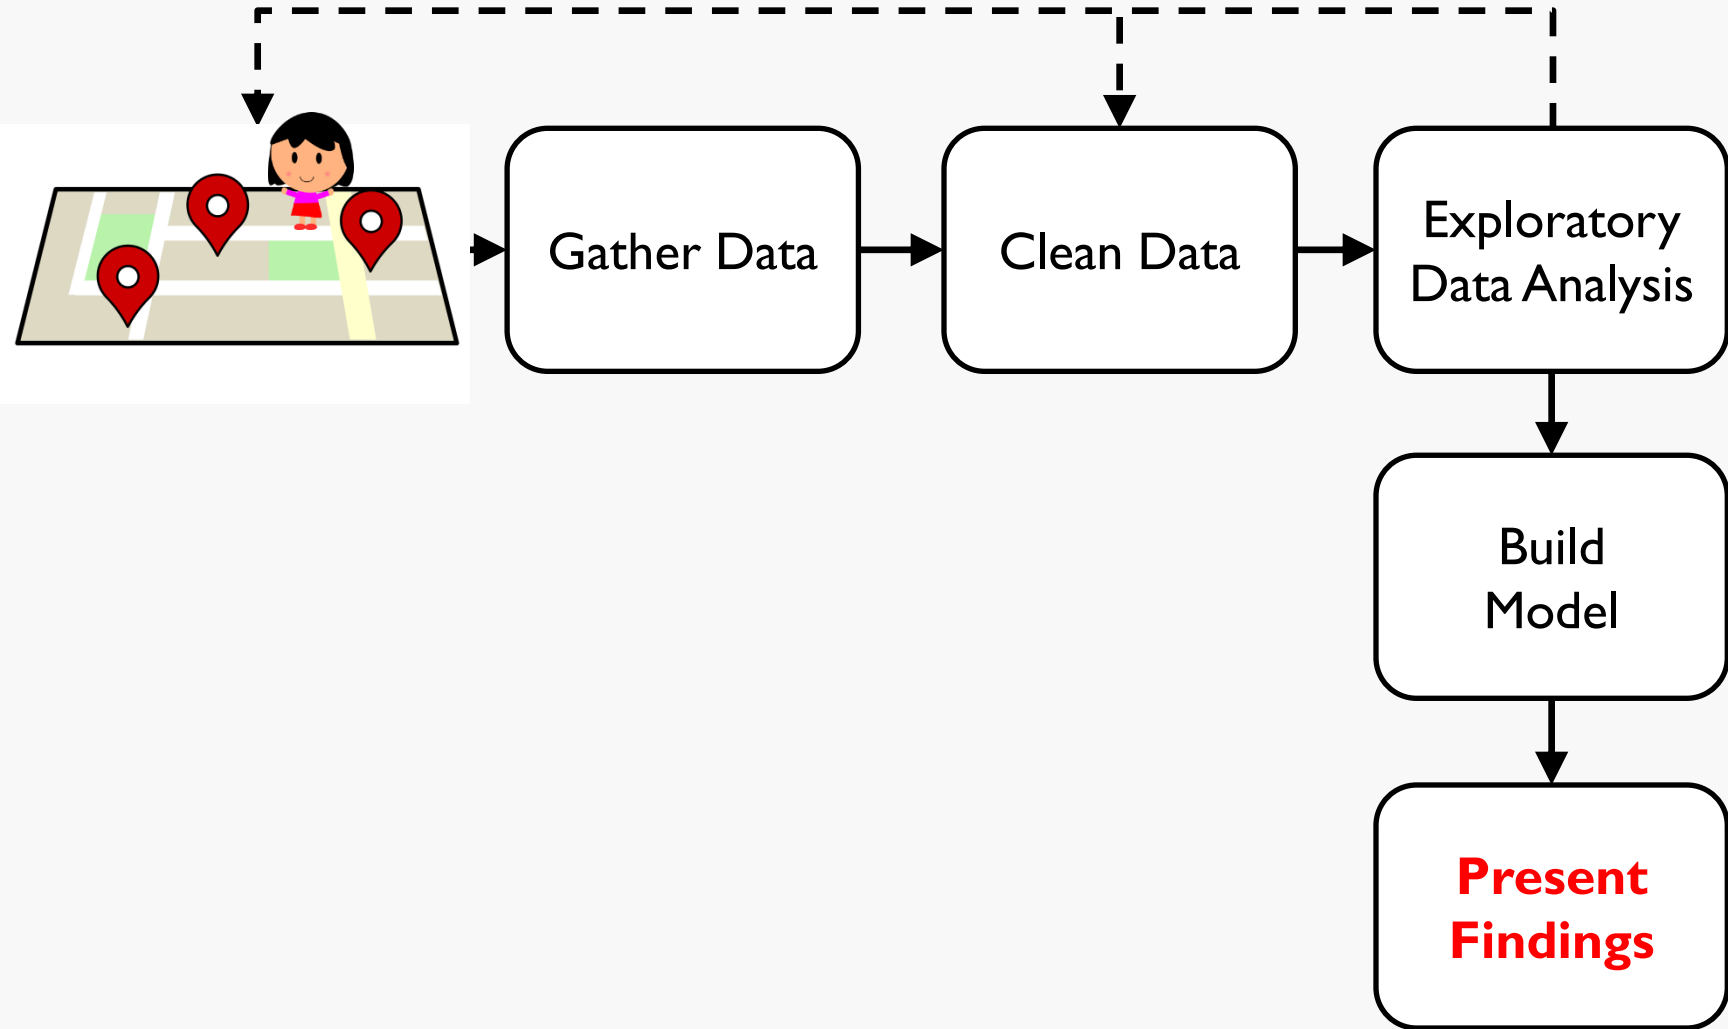

```
<distanceFromHome>1949.46</distanceFromHome>  
<locationLabel>cluster3</locationLabel>  
<description>awayFromHome</description>
```

Model of Me

- Dates away from home
- Local travel radius
- Likelihood of being at a location by day / time
- Significant locations

Data Science Process

DEMO

Questions I can ask the data

- Where was I on August 9, 2017 at 2:18PM ?
- Predict where I will be on Monday at 8:45AM.
- Predict when I am likely to be away on Saturday.
- Will I be home on Sunday at 10PM?

Expanded Questions

- How many days was I out of town in July?
- When was I at work on a weekend?
- How many times did I visit the grocery store last month?
- How long does it usually take to drive to work?
- When was I last at the Grand Canyon?

DISCUSSION

Assumptions

- Regular schedule
- Home
 - More often than anywhere else
 - More often on weekday evenings & weekends

When This Doesn't Work

- Irregular schedule / lots of travel
- Not enough points
- Bad technology
 - signal
 - hardware

Bad Technology

Cautions

- Analysis is a general pattern of behavior
- Locations may be inaccurate (Google itself asks for corrections)

Don't let Google Ruin Your Life!

My girlfriend likes to track me on google maps and i encourage that but the fact that the maps are showing me in places and addresses i am not nor have ever been is really creating trust issues she now thinks im a liar and a cheat and trying to hide things from her.

THANK YOU GOOGLE FOR THE PROMBLEMS YOU ARE CREATING IN MY LIFE

i am not s liar or a cheater but your maps say different i hope you google bastards have the same issues with the people you care about so you know how it feel

Implications

*Your insurance
claim was
denied due to...*

Benign

Worrisome

Big Brother on wheels: Why your car company may know more about you than your spouse.

The Washington Post (January 15, 2018)

“... an automaker can vacuum up a massive amount of personal information about someone ... where he shops, the weather on his street, how often he wears his seat belt, what he was doing moments before a wreck — even where he likes to eat and how much he weighs.”

Companies race to gather a newly prized currency: Our body measurements

The Washington Post (January 16, 2018)

“Clothing companies now see body measurements as one of their most prized currencies, and millions of Americans are increasingly offering up their innermost personal data in search of customized pieces or a better fit.”

“These body measurements look a lot like medical records...”

“... privacy experts worry that the retailers eventually will be tempted to sell the data ... Or the information could become the target of hackers. Passwords can be changed; body sizes can't.”
